

Metal Craft and Riverside fully understand the importance of this issue to our customers and are committed to the corporate social responsibility of a conflict free supply chain.

Suppliers are expected to adopt policies and systems with respect to conflict minerals and to require their suppliers to adopt similar policies and systems.

OUR COMMITMENT:

- 1. Support the objectives of the U.S. legislation on the supply of "conflict minerals".
- 2. Do not knowingly procure specified metals that originate from facilities in the "Conflict Region" that are not certified as "conflict free".
- 3. Ensure compliance with these requirements, and ask our suppliers to undertake reasonable due diligence with their supply chains to assure that specified metals are being sourced only from: Mines and smelters outside the "Conflict Region" or have been certified by an independent third party as "conflict free" if sourced within the "Conflict Region".

The aim is to ensure that only "conflict free" materials and components are used in products that we procure. If we discover the use of these minerals produced in facilities that are considered to be "non-conflict free", we will take any appropriate actions necessary to transition product to be "conflict free".
